

GREEN ROOF SAFARI

THE WORLD'S FIRST STUDY TOUR OF EUROPEAN GREEN ROOFS

TO GERMANY AND SWITZERLAND

THIS DYNAMIC INTRODUCTION TO THE MATURE EUROPEAN MARKET INCLUDES:

- access to a variety of projects
- dialogues with policy-makers
- meetings with designers & researchers
- detailed documentation
- comfortable travel
- walkable days
- cultural jaunts, independent time
- aperitifs with fantastic views

TESTIMONIALS GREEN ROOF SAFARI 2008

"The tour was excellent and worth the time and money... Meeting with numerous government policy-makers and green roof professionals enlightened me as to why green roofs are so prevalent in these countries compared to the U.S."

"Green Roof Safari was a very comprehensive look at green roof technology, from issues of design to implementation. The knowledge base and unique access to projects provided by the tour leaders makes this a not-to-miss tour for anyone interested in learning more about green roofs."

GREEN ROOFS ARE THE NORM HERE, NOT THE EXCEPTION.

Green Roof Safari offers special access to the European industry. Meet with local professionals for current and historical trends in policy, research and design. Take in views and visit projects that are impossible to access. Make contacts that can change your world view. Travel in comfort with knowledgeable, professional, multi-lingual guides summing 40 years collective green roof experience.

YOUR HOST:

CHRISTINE THÜRING MSc. HORTICULTURE

I've worked with green roofs internationally since 2001 and look forward to introducing you to unique green roof projects and local experts.

My Swiss-Canadian upbringing allows me to communicate across disciplines and cultures, from building science to ecosystems thinking. This tour will foster the spirit for sharing and community that is key to sustainable successes.

Experiential learning will be balanced with cultural jaunts and pre-dinner aperitifs with inspiring views.

YOUR HOST:

JÖRG BREUNING PRINCIPAL GREEN ROOF SERVICE^{LLC}

Before coming to the U.S., I was a green roof project manager in Stuttgart for over 25 years, and worked on many of the sites we'll visit.

Through these projects and the local experts you will meet, this tour will equip you with a broad spectrum of possibility for green roof design, research and policy.

Our goal is to help you grasp the full potential of green roof technology, and to provide you with the tools and contacts to achieve this potential in your hometown.
